Projects

Portfolio website (*ReactJS, JSX, HTML, SAAS, Git-Hub, Adobe Illustrator*)

- Created a responsive and engaging web application using the **ReactJS framework**.
- Leveraged **React hooks** like **useEffect** and **useState** to achieve superior performance and interactivity.
- Incorporated **React Router DOM** to enable RESTful routing and improve the user experience.
- Utilized **NPM packages** such as **Emailjs/browser, loaders, react-leaflet, saas, and fortawesome** to streamline development and enhance the application's functionality.

Meme Generator (*ReactJS, HTML, CSS, API, Postman*)

- Developed a React application that generates random memes using the **Imgflip API**.
- Implemented **React hooks** such as **useState** and **useEffect** to manage the application's state.
- Wrote a function that fetches a list of memes from the Imgflip API using the **fetch API**.
- Created a form with two input fields that allow users to add custom text to the top and bottom of the generated meme image.

Chrome Extension (*HTML, CSS, JAVASCRIPT*)

- Developed a Chrome extension to store and manage website links using HTML, CSS, and JavaScript.
- Utilized the **Chrome API** to extract the current tab URL and add it to an array of website links.
- Stored the website links in **local storage** using **JSON.stringify()** and retrieved them using **JSON.parse()** for persistence across browser sessions.
- Added functionality to delete all website links from local storage and the HTML page using a **delete button**.
